PROFESSIONAL PROFILE

Web & Application Developer with 2 years of hands-on experience building modern, responsive and functional web experiences for businesses, startups and individuals. Skilled in JavaScript and React, with experience combining modern AI technologies with web development to create practical digital products. Experienced in developing e-commerce platforms, marketplaces, dashboards and database-driven applications, with a focus on responsive interfaces, useful functionality and user-friendly experiences. Comfortable taking projects from requirements and concept through development, testing, deployment and improvements.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, React, HTML, CSS, Responsive Web Development

Application Development: Web Applications, E-commerce, Marketplaces, Dashboards, Authentication, Product & Order Management, API Integration, Payment Integration, M-Pesa Integration

AI & Modern Development: AI-assisted development and integration of modern AI technologies into practical web applications

Other: Database-driven Applications, UI/UX Implementation, Deployment, Bug Fixing & Improvements, MVP Development

PROFESSIONAL EXPERIENCE

Independent Web & Application Developer | 2024 – Present | Kenya

- Build responsive websites and web applications for practical business and digital-product use cases.
- Develop frontend experiences using JavaScript and React, with attention to responsive design and usability.
- Build features including authentication, dashboards, product management, order workflows, payment functionality and database-backed experiences.
- Integrate APIs and modern AI technologies where they add practical value.
- Take projects through development, testing, deployment, bug fixing and iterative improvements.

SELECTED PROJECTS

InvoiceFlow — Web Application

Developed a practical invoicing/business workflow application focused on invoice-related tasks through a modern, responsive interface. **Role:** Web & Application Developer.

DineFlow — Restaurant Web Application

Developed a restaurant-focused web application with a modern responsive interface and practical digital workflows designed around restaurant and customer needs. **Role:** Web & Application Developer.

EstateHub — Property Web Application

Developed a property-focused web application with marketplace-style functionality, structured property presentation and responsive interfaces for browsing and managing property information. **Role:** Web & Application Developer.

FinOra — E-Commerce & Marketplace Platform

Developed a complete marketplace platform supporting registration and authentication, product browsing and management, customer accounts, vendor functionality, order management, dashboards, payment integration and M-Pesa payment functionality. **Role:** Web Application Developer. **Live Demo:** fin-ora.base44.app

DEVELOPMENT CAPABILITIES

Business websites • Landing pages • E-commerce stores • Multi-vendor marketplaces • Booking platforms • Customer portals • Admin dashboards • Startup MVPs • Payment-enabled web applications • Custom business web applications • Deployment and post-launch improvements

EDUCATION

Egerton University — Kenya

Kenya High School — Secondary Education, Kenya
